

“THE TYPE OF
PRECISION
AND PERFORMANCE
WE REQUIRE.”

“Each race weekend, our teams compete among the greatest professional drivers in the world. When Michael Waltrip Racing made the decision to bring our chassis fabrication in-house, we needed equipment that would meet such demanding standards on a weekly basis. From Band Saws to Benders, Sheet Metal Shears to Ironworkers, our machinery from Baileigh Industrial continues to deliver the type of precision and performance we require”.
