

TESTIMONIALS

Valspar International Corp.

Machine: CS-315M

"This is a first-rate machine with professional design features. We use it to cut steel tube and bar stock, which it does with speed and ease. It's superior to our previous cold saw and cost about half as much. Our sales rep was knowledgeable, helpful and a pleasure to work with. Baileigh Rocks!"

Mr Metals Inc

Machine: RDB-150

"We use a RDB-150 for fabrication of guard and handrail. This is one of the best equipment investments we have made. If you have a fair amount of rail work, this unit will pay for itself in the first year of operation."

Air Evac Lifeteam

Machine: BB-7212

"We are extremely happy with our new brake! It fits our needs and helps us to expand our abilities to produce the finest E.M.S. helicopters in the United States."

Gest Scenic Creations – David

Machine: Roll Bender

"You guys rock. We love our roll bender and it has proved a valuable part of our shop. Bending things is just fun."

Machine Head – Dick Jobe

"As an owner of a highly specialised machine and fabrication shop producing custom architectural elements, artwork and an assortment of detailed metal products, I am pleased to have found Baileigh Industrial. Not only am I impressed with the quality of the tools and their capability of performing many applications, with the help of an array of tooling sizes, but I am equally happy with the technical service and the technical support and information. Several years ago I purchased an R-M50 Ring Roller. Baileigh went beyond my expectations. The technical knowledge and ability to communicate are excellent. I have since bought a PR-409 Plate roll, a RDB-175 Tube Bender and a TN-800 Tubing Notcher from Baileigh and was able to order all the correct tooling sizes with Baileigh's assistance. Baileigh is wonderful to work with and helps me stay within my budget. I would highly recommend Baileigh and its staff to anyone."

Allied Metals – Mark Miller

"We would like to thank your company for being so helpful and informative on our purchase of the PR-510 plate roll machine. Baileigh Industrial did an excellent job of getting any information that we requested to us in a timely manner, and it was an extreme pleasure dealing with Baileigh. Thanks again and we will definitely keep you all in mind for any future machinery needs that come up."

Horizon Tool Inc. –

Michael Seymour

"We are truly happy with your product. This unit has tripled our production. All in all, we would highly recommend it to anyone. The price could not be beat on a new machine!"

Virgil Lehmkuhler

"We have had a smaller metal band saw for approximately 10 years. It would not cut square either vertically or horizontally. I became so disgusted with it that we began looking for a better saw. After checking with several companies, we decided on the Baileigh BS-260M, which we purchased February 21, 2007. For our small iron works company, the Baileigh saw represented a major investment but one of our best. After our son used the saw the first day, it became our primary saw for the shop. The cut-off saw hardly gets used now. All the controls are very convenient and it is so nice to be able to move the saw head and not the work for angle cuts. WHAT A GREAT SAW!"

Steel Reality Mfg. –

Jeff Carlson

"We looked a long time at all the band saws on the market and just couldn't find what we wanted at a decent price. We needed a sturdy saw but our demands didn't require a large production type saw. Also, we have a very clean type shop environment and couldn't have

coolant and chips all over the floor every time the saw turned on. Another important feature was a gear drive head, and most saws in this price range were belt driven—I have personally had bad experiences with those. Then we found Baileigh Industrial and their BS-250M Band Saw really had it all, and also some other features you will not find on other models. I would recommend this saw to anyone who wants a great piece of equipment that will be a true value to your shop. Another bonus was the saw's working height—not that important at the time, but I have come to love the fact that I and others don't have to be crouched over while at the saw.

P&D Metal Works, Inc.

"We have been struggling with 90° consistent bends on 2" Stainless Sch. 40 Pipe. We purchased a RMD-350 Bender and solved our problem. The staff was excellent to work with. They even let us bring in pipe to test the machine. Also purchased a notcher; notches fit every time. Excellent."

Utopia Designs, Inc. –

Kevin Flaherty, Purchasing Agent

I am pleased to report excellent performance for our two new band saws. Our metal shop supervisor was so impressed with the Baileigh BS-260M's performance that our company immediately added a second saw, the BS-210M, to our design and development department. All in all, I am pleased to say that Baileigh band saws are of benefit to our design and fabrications divisions. We are budgeting for additional Baileigh equipment in the next business quarter. Thank you for providing a quality tool. We shall look forward to future business with Baileigh Industrial.
